GO Term Enrichment (LOD)
Accumulated Interactions
Depleted Interactions
0
2
polyol transmembrane transport
plasma membrane part
ATPase coupled transmembrane transport
cation transmembrane transport
doxorubicin
iron ion transmembrane transport
heat shock
menadione
organic acid transmembrane transport
organelle membrane
organic acid metabolic process
H2O2
transmembrane substrate transport
methionine
ion transport
spermine transmembrane transport
N-starvation
sorbitol
endoplasmic reticulum part
ethanol
AA-mixture
cell membrane
ribosome biogenesis
single-organism transport
1181-0519
NaCl
O-acyltransferase activity
actin filament regulation
FK506
atorvastatin
Arp2/3 protein complex
cellular lipid metabolism
carboxylic acid biosynthesis
xenobiotic transporter activity
lipid particle
